

NITISH KUMAR

Frontend Developer

+91-7899100243 | nishkumar562@gmail.com | [GitHub](#) | [LinkedIn](#)

Professional Summary

Frontend Developer with 2.6 years of experience building and maintaining production-grade user interfaces using React, Next.js, and TypeScript. Strong hands-on experience with JavaScript-driven UI workflows, browser-based automation, and Chrome extension development. Focused on frontend architecture, state management, and shipping reliable features in fast-paced product environments.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML, CSS

State Management: Redux, React Hooks, Context API

Browser & UI: Chrome Extensions, DOM Manipulation, Chrome APIs

Tools & Practices: Git, Vite, Chrome DevTools, REST API Integration, Responsive Design

Work Experience

Inventys Pvt Ltd

Software Developer

Bengaluru, India

Feb 2023 – Present

- Built and maintained reusable React components forming the core frontend UI across multiple modules of an RPA-based automation platform
- Created complex, form-driven user workflows with validation, conditional rendering, and dynamic state updates using React and TypeScript
- Managed frontend application state using Redux and React Hooks to ensure predictable data flow across large, interactive interfaces
- Designed and executed key features in the platform's Chrome extension to support browser-based automation and web recording workflows
- Applied full-page screenshot capture functionality in the Chrome extension by stitching viewport-level captures using Chrome APIs, enabling accurate visual recording of long web pages
- Built DOM tree extraction logic within the extension to capture structured page metadata and store it in JSON format for downstream automation and workflow execution
- Enhanced automated file upload handling within recorded workflows, enabling end-to-end automation of user actions without manual intervention
- Integrated frontend interfaces with backend REST APIs, handling loading states, error scenarios, and edge cases to ensure a stable user experience
- Debugged and resolved production UI issues across web and extension components, contributing to consistent application stability

Projects

Invoice Book – Cross-platform Invoice Management Application [Code](#) | [Live Demo](#)

- Designed and developed a cross-platform invoice management application using React and TypeScript, focusing on clean UI workflows and usability
- Executed centralized state management with Redux to support invoice creation, editing, and listing functionality
- Built reusable form components with validation logic for financial fields such as totals and taxes
- Applied frontend performance techniques such as lazy loading and memoization to maintain responsive user interactions
- Packaged the application using Tauri to deliver a lightweight desktop experience with fast startup time

Education

KLE Society Degree College
Bachelor of Computer Applications (BCA)

Bengaluru, India
2019 – 2022

Certifications

HackerRank JavaScript (Basic)

2024

Validated understanding of core JavaScript concepts including functions, objects, arrays, and problem-solving fundamentals

HackerRank Problem Solving (Basic)

2024

Demonstrated ability to apply logical reasoning and basic data structures to solve programming challenges

Additional Information

Key Strengths: JavaScript fundamentals, frontend architecture, browser-based automation, debugging production UI issues

Languages: English, Hindi, Kannada
